

## KIntelliVision

We detect what you cannot see with your eyes

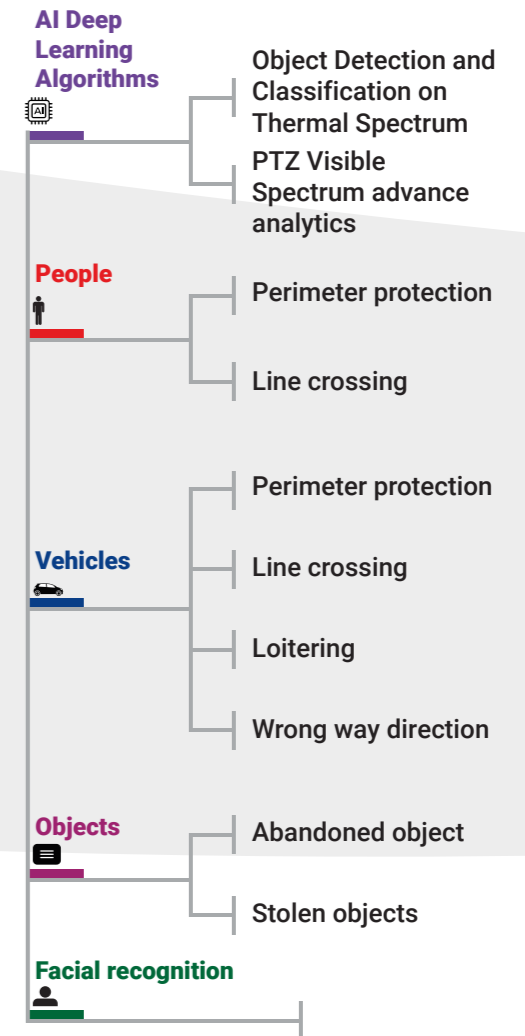

---

**softrust** 

# Facial recognition system

## Analysis functions

**KIntelliVision** can analyze video data, extracting information for various purposes, from real-time notification of perimeter violations, facial recognition for access control, traffic density measurement, triggering alarms for illegally parked vehicles, abandoned/suspicious luggage detection or stolen objects from the frame.

### Benefits

- › KIntelliVision can accurately detect in real time any activity, object or suspicious person, and can provide alert for rapid intervention
- › Quick intuitive view of occurred events: descriptive information and recordings from the moment the event took place.
- › Easy access to film event
- › Searching and visualization mode for registered events
- › Remote command and control
- › Interactive E-map module

### Applications

- › Critical infrastructures
- › Defense
- › Borders security
- › Ports
- › Airports
- › Oil/Petro - chemical industry
- › Government institutions
- › Health
- › Education
- › Industry
- › Retail
- › Halls and warehouses

### Features

- › Real time alerts and relevant reports, reducing the human errors of the security personnel
  - › Automatic detection of the objects in sterile area by using analytical algorithms
  - › Real-time video information through the alarm function
  - › Decreased number of false alarm
  - › Independent operation of the environmental conditions and brightness
- KIntelliVision license can be installed on one or more channels / workstation.
